DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 11-13, 18, 23, and 25-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103. Specifically, in reference to independent claims 1 and 23, none of the prior art either alone or in combination disclose or teach of the claimed corneal topography analysis system and method of analyzing corneal topography specifically including, as the distinguishing feature(s) in combination with the other limitations the claimed "the neural network is trained so as to input corneal topography having been clinically judged in advance, including keratoconus, keratoconus suspect and pellucid marginal degeneration, determines weighted coefficients for each corneal topography and output the judging result of the corneal topography."
3. Specifically, in reference to independent claim 11, none of the prior art either alone or in combination disclose or teach of the claimed corneal topography analysis system specifically including, as the distinguishing feature(s) in combination with the other limitations the claimed "analysis unit converts the corneal shape data entered from the input unit into a denser first data matrix by interpolation, removes high-frequency components from the data by frequency analysis, and converts obtained data into corneal curvature data in the form of a given second data matrix."
4. Specifically, in reference to independent claims 18 and 25, none of the prior art either alone or in combination disclose or teach of the claimed corneal topography analysis system and

method of analyzing corneal topography specifically including, as the distinguishing feature(s) in combination with the other limitations the claimed "an analysis unit that converts the corneal shape data into an orthogonal coordinate data matrix as a denser first data matrix by interpolation, removes high-frequency components by fast Fourier transform FFT from the data, smoothes data into a polar ."

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
